

POST

The screenshot displays a REST client interface. At the top, a dropdown menu is set to 'POST' and the URL 'http://localhost:90/libro/' is entered and highlighted with a red box. Below the URL bar, tabs for 'Params', 'Authorization', 'Headers (10)', 'Body', and 'Pre-request Script' are visible, with 'Body' being the active tab. Under the 'Body' tab, radio buttons for 'none', 'form-data', 'x-www-form-urlencoded', 'raw' (selected), and 'binary' are shown. The main area contains a code editor with a red box highlighting the following JSON payload:

4   "precio": 14.50,

```

Below the editor, tabs for 'Body', 'Cookies', 'Headers (7)', and 'Test Results' are present, with 'Body' selected. Further down, buttons for 'Pretty', 'Raw', 'Preview', and 'Visualize' are shown, followed by a 'JSON' dropdown and a refresh icon. The response area shows the following JSON output:
